

# Science News @ Kingfisher

Welcome to our **brand-new** Kingfisher science newsletter; a way to share all things science with families every half term. We have all been extremely busy with our science learning at school and have lots of news to share with you!

## Science Ambassadors!

Firstly, I'd like to introduce our science ambassadors. These are a group of children who enjoy science and want to make it better! They are in charge of lots of different scientific responsibilities to improve our science learning. One of these is writing this newsletter: all the information about what we've been learning have come directly from us!

Y1 - Bella and Marilena

Y2 - Salieu and Sophie

Y3 - Gilead and Freya

Y4 - Franchesca and Charlotte

Y5 - Ola and Veer

Y6—Esme and Treh

SCIENCE  
AMBASSADOR

## Half term science selfie competition!

Want to be in with a chance to win some fabulous science prizes? (Kindly donated by Asda)

Just have a look at the competition alongside this newsletter —take a science selfie at home and send or bring it back into school before 6th March for your chance to win the prizes photographed here!

# What we've been learning...

## Year 1

We have just started learning all about **plants**. We explored the difference between deciduous and evergreen trees, going on a search around the school.

"I like science in our class... I like going on science walks."

Eric, Y1

## Year 2

We are learning all about **plants** too! We have looked at all the different parts and started a plant investigation.

We know who Tim Smit is too!

"I really have loved learning about plants." Arlo, Y2

## Year 3

We are learning all about **animals including humans**. We have learnt how we should stay healthy, having a look at how much sugar is in things. Did you know a chocolate bar has 8 teaspoons of sugar?

"I like our science because we do lots of investigating."

George, Y2

# What we've been learning...

## Year 4

Our topic is **electricity**! We have connected wires using batteries, making bulbs light up. Everything has to connect together so it will work

"I love science because it helps to know about our world."

Esther, Y4

## Year 5

We are learning about **materials**! So far, we have looked at which materials conduct electricity and that not everything is soluble. Ask us what these words mean!

"It's really interesting!" Niall, Y5

## Year 6

We have just finished learning about **the circulatory system** and our bodies. We have dissected a lamb's heart, explored how nutrients and water travel around the body using skittles to show osmosis and what blood is made of. We have had so much fun!

"Science is really fun and I enjoy it." Phoebe, Y6
